

Main characteristics

- High precision dimensions
- Many possible materials
- Custom dimensions tailored to your application

Applications

- Combiners
- Biophotonics

The high precision capillaries we produce are drawn to meet your exacting dimensional needs. We have a wide range of diameters of precision finished rods, manufactured with tight tolerances. Furthermore we can provide non-circular tubes and rods.

Specifications

Type	Capillary	Rod
Outer diameter (OD) (mm)	0.1 → 10 +/- 0,01	
OD / ID ratio	1.1 to 15	NA
OD tolerance (µm)	+/- 10	
Material	Silica F300, Doped Silica (F, Ge...)	
Length (mm)	50 → 1500	
Wall thickness (µm)	> 40	NA

*The maximum length is limited by the authorized size of the package transporter.
